

TECHNANCIAL ANNOUNCES A BIG UPGRADE TO THE JANUS SUITE IN THE RELEASE OF A NEW DYNAMIC DASHBOARD

Tuesday June 4th, London: JANUS Risk Manager (JRM), version 19.05 is being rolled out to clients around the globe. The Technancial Company (TTC) added a new method of aggregating data, rules and alerts in an even more effective manner, giving risk and trader managers even more oversight into complex global trading activities.

This newest version will make Award Winning JANUS Risk Manager even more flexible, in both configuration and daily use. The Dashboard (Riskboard in the JRM terminology) has additional user definable views, with a richer set of widgets (riskgets), dynamically updating content based on what each user is interested in. Point and click with auto sorting and filtering data to take the user directly to the source of the alert.

What is revolutionary is the holistic approach that this dashboard takes, enabling the user to in a single click see all the important facts associated with an account on demand, while at the same time reducing the effort in setting rules up. JRM has additionally had some core changes to support the new Riskboard presentation logic and continue to enable further scalability as client volumes grow and as more business areas use the software to validate risk settings and to document transgressions. The new approach to measuring risk is complemented with JANUS Behavioural Analytics (JBA) that stores all the data related to checks with all account activity going back in time, giving a holistic view of trading and the relationship to risk checks and their appropriateness.

TTC's Mirko Marcadella, Managing Director of The Technancial Company, said, "We are excited that our software continues to improve in leaps and bounds, and is heavily influenced by our clients' rapidly evolving needs."

About The Technancial Company Ltd. (TTC)

The Technancial Company Limited delivers advanced real-time risk management, trade surveillance and analytical tools to global markets. TTC's products, JANUS™

Risk Manager, JANUS™ Margin Engine, JANUS™ Trade Surveillance, JANUS™ Behavioural Analytics and JANUS™ Margin On Demand are used by global institutions across markets, regions and asset classes to supervise their trading, market making, DMA and HFT activities. More than 80 risk rules and more than 60 clearing houses' margin algorithms are supported by the JANUS™ Platform and can be used in pre-trade, post-order (at-trade) and post-trade to manage market, credit and operational risks in demanding environments.

Best of breed modern technologies are used in a scalable, easy to maintain system that simplifies customer IT. JANUS manages high volume transaction data in real time and historically, integrating seamlessly into existing application ecosystems.

Why JANUS™? Janus is the twofaced god of beginnings, gates, transitions, time, looking to the future, anticipating future risks and threats, and looking at the past, understanding previous events.

The company is headquartered in London and has offices in Chicago, Hong Kong and Milan. For more information please visit <http://technancial.com/>
