

TECHNANCIAL'S JANUS™ RISK MANAGER AWARDED RISK DASHBOARD OF THE YEAR, 2019

Tuesday June 18th, London & New York: Risk.net awarded The Technancial Company Ltd's JANUS Risk Manager, the title of 'The Risk Dashboard of 2019'.

JANUS™ Risk Manager (JRM), the multi asset, currency and market, real-time risk management and order validation system for exchange traded instruments, owes its success to its flexible and highly scalable dashboard for real time data monitoring, updates and rule checks. The modern JANUS™ user interface allows users to easily configure their dashboard and prioritise content without the need for IT support or programming skills.

The award was judged by a panel that interviewed JANUS™ users, and heard about its unique strengths.

JRM Dashboard, with user definable views, a rich set of widgets (riskgets), dynamically updating content based on what each user is interested in, offers point and click with auto sorting and filtering data to take the user directly to the source of the alert. The revolutionary holistic approach that TTC's JRM takes, enables users to see all the important facts associated with an account on demand, while at the same time reducing the effort in setting rules up.

TTC's Mirko Marcadella, Managing Director of The Technancial Company, said, "We are delighted to have earned this recognition for our team's hard work. Designing JANUS as a 'gatekeeper', we didn't predict that its use would go so much beyond this with clients adding to the rich feature set, making it more than 'just a safety tool'. Users saw how much could be learned from risk rule alerts, and realised that there was a lot more information in data captured even before an alert happened. The JANUS Dashboard provides a modern access to JANUS Risk Manager real-time measurements and alerts as well as JANUS Behavioural Analytics historical data and analytics. It represents a new disruptive paradigm in limit setting and monitoring."

About The Technancial Company Ltd. (TTC)

The Technancial Company Limited delivers advanced real-time risk management, trade surveillance and analytical tools to global markets. TTC's products, JANUS™ Risk Manager, JANUS™ Margin Engine, JANUS™ Trade Surveillance, JANUS™ Behavioural Analytics and JANUS™ Margin On Demand are used by global institutions across markets, regions and asset classes to supervise their trading, market making, DMA and HFT activities. More than 80 risk rules and more than 60 clearing houses' margin algorithms are supported by the JANUS™ Platform and can be used in pre-trade, post-order (at-trade) and post-trade to manage market, credit and operational risks in demanding environments.

Best of breed modern technologies are used in a scalable, easy to maintain system that simplifies customer IT. JANUS manages high volume transaction data in real time and historically, integrating seamlessly into existing application ecosystems.

Why JANUS™? Janus is the twofaced god of beginnings, gates, transitions, time, looking to the future, anticipating future risks and threats, and looking at the past, understanding previous events.

The company is headquartered in London and has offices in Chicago, Hong Kong and Milan. For more information please visit <http://technancial.com/>
